WORK EXPERIENCE

Roam.lol – AI Game Engineer

San-Francisco, USA (Remote) | Aug 2026 – Present

- Shipped 30+ mobile-first 3D web games (**Three.js + Rapier**) with **Claude Code** and **MCP** servers for scaffolding, asset generation, preview and publishing.
- Deployed **subagents** and parallel workflows, browser-automation testing, a ~90-entry **agent memory playbook** so a solved bug stays solved.
- Built a **reusable Claude Skill** packaged for the team, a 35-prompt game-spec library, and studio MCP scripts that unblocked a broken publish path.
- **Verified AI-written code** by running generative asset pipelines(text-to-3D GLB, PBR material, audio) with generator/**critic review loops**

Infineon Technologies AG – AI Computer Vision Engineer

Linz, Austria | Jun 2023 – Sep 2025

- Developer of an internal framework for computer vision models (**YOLO, ResNet, R-CNN**)
- Optimized and automated the processing pipeline, achieving a **200x increase in speed and efficiency**
- Designed and implemented a **Real-Time Multi-cameras** processing setup for simultaneous area recording(**GPU CUDA Development**)
- Conducted continuous testing and validation of the framework, identifying and resolving integration issues
- Communicated complex technical concepts clearly to team members and stakeholders

Freelance – Python Developer

Remote | Jul 2019 – Aug 2019

- Recreated databases for one of the largest HR services platforms in Russia using **Scrapy** and **SQL**
- Collaborated with a team to extract, clean, and organize large-scale data
- Troubleshoot and resolved technical issues during database reconstruction

Olympiad Programming Contests

Russia | Jun 2017 – Jan 2019

- Participated in competitive programming contests
- Demonstrated advanced problem-solving and Python programming skills

SKILLS

Programming Languages: Python (**PyTorch, NumPy, Pandas, CUDA**), Java, C++, JavaScript

Tools & Technologies: Linux, Git, Microsoft Tools, MySQL, Supabase, Claude Code, MCP servers & custom MCP tooling, LLM Skills & agent memory, generative 3D/image/audio models, Three.js, Rapier, Node.js, WebGL, Web Workers

Domains: Computer Vision, Deep Learning, Real-Time Systems, Prompt Engineering

Languages: German, English, Russian

EDUCATION

M.Sc. in Computer Science (Exchange)

Hanyang University Seoul, South Korea | Feb 2026 – June 2026

M.Sc. in Artificial Intelligence

Johannes Kepler University Linz, Austria | Oct 2025 – Present

B.Sc. in Artificial Intelligence

Johannes Kepler University Linz, Austria | Oct 2021 – Present

B.Sc. in Information Security (unfinished)

MIREA – Russian Technological University | Sep 2020 – Mar 2021

Secondary Education

Lyceum №1 | Sep 2009 – Jun 2020

In-depth study of Mathematics, Economics, and Programming
